D1: WO 00/68001

D2: DE 19702851

D3 FR 2615446

D4: JP 62-270330

D5: JP 55-014235

Claim 1 defines a method of manufacturing a sheet comprising elongate cells by moving the fluted material relative to a filling station and filling the cells. Whilst each of D1-D5 discloses filling fluteboard, none disclose moving the blank sheet with open top and/or filling station relative to each other such that the movement is in a linear direction transversely across the open top. In addition, it would not be obvious to extrapolate the teachings of D1-D5 to arrive at the features defined in claims 1-39. Thus, claims 1-39 are novel and inventive over D1-D5.

All claims are industrially applicable.
